A. The DOE (CI Gov't) was advised of their right to participate, as set out in UNCLOS Part XII Article 249 (a), in the recent RRS James Cook research Cruise and other upcoming research cruises involving RV Falkor (Woods Hole Oceanographic Institute) and upcoming the Japanese Research Expedition using their human occupied submersible Shinkai 6500? B. DOE has in their possession; copies of the data-sets from each of three US cruises to the Mid-Cayman Rise since 2009 that have been forwarded to National Oceanography Center in the UK and copies of the data sets from each of the UK cruises to the Mid Cayman Rise since 2009 that are held at the National Oceanography Center in the UK? Also, has there been any correspondence to indicate that these data sets will be provided to the DOE in the near future? C. There is any evidence (to your best knowledge) of on-going efforts by the UK Government to provide any of the following: natural resource stewardship, natural resource protection, natural resource marine enforcement, or marine resource type patrols in the area around the Cayman Islands that is beyond 12 nautical miles, but within the established and demarcated Cayman EEZ borders, and / or within the extent of the un-demarcated but 'presumed' Cayman Islands EEZ, the specific geographical points of which are yet to be agreed upon with Cayman and Cuba and Cayman and Jamaica? D. Has the FCO or the Governor's Office (which have certain responsibilities for Treaties, and Internal and External Affairs and who have expressed a strong emphasis on the importance of proactive natural environment protection and environmental preservation in the Cayman Islands and other Overseas Territories) provided the DOE with any advice, guidance or instruction on how to manage, protect, preserve, monitor, patrol or otherwise provide appropriate stewardship of the areas beyond 12 nautical miles but with the Cayman Islands EEZ (both presumed and demarcated)? E. There has been any advice, encouragement or initiatives emanating from the FCO or the Governor's Office about citizens of the Cayman Islands utilizing the

resources on such places known to the people of the Cayman Islands as the Pickle Bank, or the area known as the 60 mile bank, or the portion of the 12 mile bank that falls beyond the Cayman Islands territorial waters, or any other area beyond 12 nautical miles of the shoreline of the Cayman Islands? If so, what information or advice was provided? F. Representatives of the DOE have seen the blog <http://www.thesearethevoyages.net/jc82/feb7.html>; of the U.K. Gov't Expedition to the Mid-Cayman Rise, and if representatives of the DOE are aware that In that blog, the Expedition Leader, Jon Copely wrote the following on February 7th, 2013: "It used to be said that Britain had an empire on which the sun never set, because its territories were spread all around the globe. These days, the UK actually has an "undersea empire" on which the sun mostly never shines... Our expedition will at least reveal part of it; and to me, "ownership" of seafloor territory means responsibility for its stewardship" In light of those statements, has the UK Government / FCO or Governor's office indicated to the Department of Environment if the people of the Cayman Islands have any rights to any of the bits of the ' Undersea Empire' around the Cayman Islands beyond 12 nautical miles and if so, which areas, and what sort of rights? G. DOE has been contacted by Trevor Guymer who is listed at the main contact for the Cayman Islands for UNESCO IOCARIBE, a regional subsidiary body of the Intergovernmental Oceanographic Commission? Also has DOE been contacted by the only Institutional Structure listed for the Cayman Islands, the Marine Office, Natural Environment Research Council NERC? Request for Information - Closed

Information from the Department of the Environment as it relates to the use of spearguns in the Cayman Islands and the rights of a citizen to actually own one. 1. Who can own a speargun? 2. What is the date of manufacture that would render a speargun legal? 3. How many spearguns can one individual own? 4. How many fish can one individual take in any given day? 5. When was the law tabled that banned spearguns being made on the Island from being legal? 6. Has that law been gazetted? I thank you kindly for your time and I would like to note that this is a first step in my effort of querying the guidelines and laws that apply specifically to the use of spearguns in the Cayman Islands by law abiding citizens.
